

Oil & Gas Engineering Summer Intern – Engineering Department

Vernon E. Faulconer Inc., a growing, well respected independent Oil & Gas Company, has an opportunity for a Summer Engineering Intern to work directly in support of our Engineering Manager and Staff. The position is based in our Tyler, Texas headquarters. For more information on our company, please visit www.vefinc.com.

Duties and Responsibilities:

- Assist in coordinating environmental planning project (Spill Prevention, Control, and Countermeasure) by learning regulatory standards, compiling existing data, and coordinating further development of plans and processes
- Aid in ensuring quality of data used in Engineering calculations.
- Assist in maintaining and improving Engineering databases.
- Work with Engineers to generate data driven reports.
- Provide general administrative support to Engineering group.
- Assist with special projects on an as needed basis.

Required Qualifications:

- Proficiency in Microsoft Office.
- Programming knowledge or experience (Python, SQL, Java, and VBA) is a plus.
- Good communication/interpersonal skills with ability to work with a diverse group of people.
- Ability to analyze, organize, and compile data according to established procedures.
- Demonstrated capability to assimilate information and learn technical requirements of role.
- Ability to manage multiple projects in a fast-paced work environment.
- Detail-oriented with ability to work independently with limited supervision.

Takeaways:

During the course of this internship, you will learn about Oil and Gas Operations, Project Evaluation, and Environmental Regulations. You will be familiarized with software widely utilized in the Oil and Gas industry, such as: ARIES Petroleum Economic Software, Enverus (DrillingInfo), Power BI, and MS Access, and SQL.
